

FLUID LIFE

EQUIPMENT RELIABILITY SERVICES

CARE PROGRAM

Fluid Life's **CARE Program** turns your fluid analysis data in to actionable maintenance information. Understanding your oil analysis results and determining what to do about it, is key to a successful Condition Based Maintenance (CBM) program.

Achieve **up to 20:1 ROI** on
your reliability program.

Take your condition monitoring program
to the next level with **CARE**.

What is CARE?

Through our CARE (Condition Assessment and Reliability Evaluation) Program, Fluid Life can interpret your oil analysis, deliver equipment alerts and provide proactive corrective actions to extend component life and meet or exceed benchmark hours.

CARE provides you with a structured approach for maximizing the benefits that can be captured from oil analysis as a predictive maintenance technology. The program highlights which oil analysis results are the most critical by distributing reliability alerts to your planning and maintenance teams, guidance on corrective actions, providing reminders as to what is yet to be done, and capturing the value of those corrective actions that have been completed.

PROGRAM FEATURES

- Comprehensive data quality analysis and program setup
- Continuous monitoring of oil sample results for actionable issues
- Prioritized alerts with detailed recommendations on problem oil analysis results
- Collaborative decision-support for corrective actions
- Work order creation and completion tracking
- Proactive follow-up on problem conditions

UNLOCK THE POTENTIAL

As with any improvement initiative, participation in CARE can take many shapes, and what you get out of the program is closely correlated with how much effort is expended. Fluid Life tailors its CARE Program based on your maintenance and reliability practices and ongoing feedback. With CARE, you can expect:

- Better reliability of assets
- Improved productivity
- Longer component life
- Lower oil consumption
- Lower cost of operation

Get the benefits of a sustainable and controlled Oil Analysis program.

CARE will help you establish a solid return on your oil analysis investment, ensuring you are maximizing your results while minimizing your maintenance budget.
